

Windows 7 Support to End – Time to Upgrade

Windows 7 support will end in 14 January, 2020

Microsoft will no longer provide monthly Windows Updates.

NO SECURITY UPDATES MEANS YOUR PC WILL BE AT RISK	SOFTWARE AND PERIPHERAL DEVICES MAY NOT BE AVAILABLE
You won't be able to keep your devices secure and protected from threats such as malware and viruses.	You may no longer be able to support or access new features, applications or other services due to version incompatibility.

Migration options are :

- Upgrade Existing PC Licenses to Windows 10
- Replace Existing PC with New Windows 10 Enabled PC
- Engage Outside IT Consultant for Project

Issues you may face :

- PC Compatibility
- Data Backup
- Enterprise Applications & Peripherals Compatibility
- Software Migration
- System Availability
- Increased Security Risks

Let's Find a Strategy That Suits You Perfectly

Microsoft support for **Office 2010** and **Windows Server 2008/2008 R2** will also end in 2020. Furthermore Japan will raise its **consumption tax rate to 10%** in October 2019. Therefore we suggest that you take action as early as possible.

If you are thinking of enhancing mobile/flexible work environments and refreshing other hardware/software, this may be the perfect opportunity to combine into a single project.

Please feel free to contact us regarding Windows 10 migration. We will offer you the best migration plan and strategy.
